

Interview Questions

General

- Describe your experience with open data?
- Do you know if any open data helped with your PRRs?
 - a. If so, can you give an example of the situation and how the data helped you?
- How are you or people in your organization using open data?
- What challenges might you foresee in proactively publishing open data?
 - Public records?
- Where do you exchange information/talk/learn/explore about open data?
- Suppose there were an Open Data Alliance that focuses on the sharing and proactive publication data.
 - What sort of properties would this organization have to have to keep your continued engagement?
 - What sort of things are deal-breakers for you with respect to this organization?
 - How does such an organization engage with people who are less enthusiastic/knowledgeable about open data?

Logistics – possible PRR relationship

- How do you determine whether a pair or body of requests are similar? (Is it based on institutional knowledge, the text itself, or something else?)
 - a. Explain the ways that you handle multiple similar request?
 - b. How do you triage similar requests?

Everyday

- Are there any business processes or tools that allow for more efficient and effective work related to open data?
- Can you think of any important stakeholders that use data or information from your organization as part of their own work - such as through a data sharing agreement or open data portal?
