

## Interview Questions

### General

- Describe your experience with open data?
- Has any open data helped with your PRRs?
  - a. If so, can you give an example of the situation and how the data helped you?
- How are your open data or public records being used? (By stakeholders or institutions?)
- What challenges might you foresee in publishing public records proactively as open data?
- How would you feel about a regional sharing of public records data? Are there are benefits or problems that you can see from such a relationship?
  - What's your experience with the lingo or verbiage across agencies when trying to get requests fulfilled?

### Logistics

- How do you determine whether a pair or body of requests are similar? (Is it based on institutional knowledge, the text itself, or something else?)
  - a. Explain the ways that you handle multiple similar request?
  - b. How do you triage similar requests?

### Everyday

- What are the tools you use as a PDO? How do they help you?
  - a. Are there any things that you do manually that you think you could do more efficiently with a particular tool?
- Are there any business processes or tools that allow for more efficient and effective work?
- Can you think of any important stakeholders that use data or information from your organization as part of their own work - such as through a data sharing agreement or open data portal?
